Dear Hiring Manager,

I am interested in opportunities within your organization. As an MCA candidate at Presidency College, Bangalore, with experience in software development, data analytics, and machine learning, I am eager to contribute my technical expertise and problem-solving skills in a dynamic environment.

My academic background has given me a strong foundation in Python, C++, data structures, statistics, SQL, and web technologies. In addition, I have completed several practical projects that enhanced my technical and teamwork skills.

During my internship at LYD Technologies, I developed a dynamic website to improve internal tool accessibility while gaining exposure to hardware–software integration and system optimization. This experience enhanced my adaptability, communication skills, and ability to work effectively in professional environments.

I have also completed data-driven projects such as Spotify User Behaviour Analysis and iPhone Sales Trend Analysis using Pandas, NumPy, and data visualization tools to identify meaningful insights and trends. Additionally, my Machine Learning project — Personalized Fitness Diet Recommendation System — involved end-to-end development, including data preprocessing, model building, backend integration, and deployment using Flask.

I am particularly interested in roles that offer opportunities to learn, collaborate, and contribute across various areas of technology, while working in flexible and growth-oriented environments. I am a quick learner, highly adaptable, and motivated to continuously improve my skills while delivering impactful results.

I am confident that my technical skills, dedication, and willingness to learn would make me a valuable addition to your team. I would welcome the opportunity to discuss how my background and experiences align with your organization's goals.

Thank you for your time and consideration. I look forward to hearing from you.

Warm regards,
Piyush Kumar
